CUSTOM CONFIGURATION

The Lizard Line is created with the hardware platform configured on the actual need of the customer. The customization provides the possibility to modulate the type of CPU, RAM memory, the size of the SSD supports, the input / output connections and the type of power supply. The Iris Display HMIs are equipped with a highly sensitive 5-wire Resistive or Capacitive Touch-Screen (Multitouch). The new Lizard line offers numerous possibilities for configuring the optional front interfaces, with high quality modules and with an IP67 degree of protection.

SUNLIGHT READABLE

The screen is legible even when exposed to intense sunlight, thanks to its high brightness 1000 nits panel with anti-reflective technology.

IP67 FRONT PROTECTION.

IP67 rated liquid / dust proof front plate hardware.
